## **Tips for your poster presentation**

1. Posters should stimulate discussion and not provide a long text presentation of your work. Please focus on graphics, figures and tables and try to keep your text as short and concise as possible.
2. Providing poster handouts to supplement your poster information is encouraged. Please consider that it would be ideal, if your poster also reproduces well when printed in black / white.
3. Posters should be easily readable at a distance of 1.20 meters or equivalently 4 feet.
4. Please try to place figures / table / photos close together with the accompanying text.
5. Please remember that a light grey or neutral white background is usually most comfortable for your eyes to read. Dark and bright colors as background may be uncomfortable.
